SUMMARY

I'm an undergrad at Sir M Visvesvaraya Institute Of Technology Bangalore, a web developer focused on frontend development. I am working in web development, problem-solving, public speaking and an enthusiast learner. I enjoy turning complex problems into simple, beautiful and intuitive designs.

I'm truly passionate about my work and always eager to connect with other fellow learners. While I enjoy all aspects of my role, I think my favorite part of any project is working & discussing with the inspiring and like minded souls. I love to discuss national and world politics and various government policies whenever I get time and place.

Apart from being a developer, I enjoy most of my time playing basketball, also a member of several teams including the college basketball team. Leaves no opportunity to speak publicly and address large gatherings whenever I get the chance to do so.

I'm always interested in hearing from others and interesting creative folk, so feel free to contact me if you'd like to connect. Connect with me on my social handles, will love to interact with you over there.

EDUCATION
